

## Message from the Director-general

### Harvest of STSP in 2010

Park enterprises experienced a turnover of NT\$605.88 billion and the creation of 56,388 job opportunities.

We also introduced the investment of 25 new Park enterprises to the STSP. With the continuous promotion of the Southern Taiwan Biomedical Device Industrial Cluster Development plan, the presence of 25 biomedical device manufacturers and 9 academic and research institutes at the STSP was approved with an investment amount exceeding NT\$2.5 billion. We also leased out 20.71 hectares of land, 30-unit standard factories and 644 dormitory rooms. Shuttle bus service is now available thereby creating seamless transportation between and among the STSP, Taiwan Railways, and High Speed Rail.

We have been granted the 2<sup>nd</sup> Government Service Quality Award in recognition of the construction and service of its disaster response system.

We have completed the first environment white paper of Science Park around the world, winning the Special Award for Sustainable Reporting of Non-profit Organization.

We set out three development goals including industrial cluster development, the building of a sustainable Green Science Park, and the promotion of culture and art with the expectation to be the example of high-tech industrial green Park and contribute to the sustainability of the global environment.

With the assistance and support from all fields of society as well as continuous efforts and innovation, the STSP has led the high-tech industry in Taiwan to many fruitful achievements. In the future, the STSP Administration will continue its efforts to drive industrial growth with innovative concepts. We, at the STSP Administration, will work hand in hand with Park enterprises and local people to build another golden decade.

Southern Taiwan Science Park Administration  
Director-general
