2ND EDITION

From code to clinic:
Shaping human-centered AI in healthcare

aimedicine.one

<+Dear Prospective Partner>

We are pleased to invite your institution to become an **Academic Partner of AIMed Global Forum 2027** — the Artificial Intelligence in Medicine international conference, held 6–8 May 2027 in Kraków, Poland.

AIMed Global Forum is a joint initiative developed by scholars from the Polish Institute for Evidence Based Medicine (PIEBM), the Big Data Institute at the University of Oxford, the Department of Medicine at McMaster University, and the Interdisciplinary Health Data Center of the Jagiellonian University Medical College.

Launched in 2025 and now a three-day flagship event, AIMed Global Forum brings together clinicians, researchers, regulators, patients, and AI developers to build the conversations that carry AI from code to clinic. Many promising AI tools never reach patients — what's missing isn't the technology, but the right people in the right room.

An Academic Partnership places your institution at the center of that community — as an active contributor, not simply a logo among many. We look forward to building a partnership that advances the future of AI in medicine together.

<+Why partner with AIMed Global Forum>

International academic reputation

Stand alongside the University of Oxford, McMaster University, and Jagiellonian University Medical College as a named Academic Partner of a flagship international conference — a visible marker of your institution's leadership in medical AI.

Research collaborations & networking

Meet potential co-investigators and consortium partners, regulators and patient representatives from 35+ countries — clinicians, AI developers, and regulators who rarely convene in one place. AIMed Global Forum is where cross-institutional research questions, grant consortia, and joint publications take shape.

Student & early-career opportunities

Bring your students, PhD candidates, and early-career researchers into a world-class environment — presenting posters, entering the startup competition, and learning directly from global leaders in AI and medicine.

Access to regulators and policymakers

Put your institution in the room with the people shaping the rules — the European Medicines Agency, the architects of the European Health Data Space, and national health authorities who convene at AIMed Global Forum as equal partners.

Industry engagement and technology transfer

Position your labs and spin-offs in front of medtech companies, startups, and investors — opening doors to technology transfer, commercialization, and industry-funded research.

<+What to expect at AIMed Global Forum 2027>

Keynote sessions
Leading voices in the field

Research presentations
State-of-the-art science & evidence

Hands-on tutorials
Practical, applied skills

Workshops
Thematic working formats

Interactive poster sessions
Open exchange of work

Startup competition
Innovation in the spotlight

<+2027 main programme tracks>

- AI for Public Health
- AI Implementation and Hospital Management
- Safety, Security & Data
- AI for science and drug discovery

<+Who belongs here>

- Clinicians
- AI researchers
- Data scientists
- Regulators & policymakers
- Ethicists
- Health system leaders
- Patients
- Startups & medtech
- Investors
- Students & ECRs
- Medical informaticists

McMaster University,
Canada

Andrzej Ryś
MD
Former Director for Health Systems & Innovation, European Commission; co-creator of the EHDS; Board Member, Medical Research Agency, Poland

Gabriela Gajewska-Jędrzejczyk
Director of Conferences
Polish Institute for Evidence Based Medicine, Poland

<+AIMed Global Forum 2027 Academic Partnership>

Reserved for academic institutions. One partnership, built around your faculty and students.

Programme & academic engagement

- Up to 20 in-person registrations for your faculty, researchers, and students (valid across AIMed Global Forum and parallel medical events MIRCIM & Young Talents — one ticket, three events)
- Up to 20 virtual registrations
- Institutional 12-month access to AIMed 2025 and 2026 lectures and recordings on the ebm.one platform
- Access to the AIMed Global Forum attendee directory (name, affiliation, country — GDPR compliant) to support academic networking and collaboration
- 25% discount on additional registrations for your institution

Presence & visibility

- Recognition as Academic Partner of AIMed Global Forum on the AIMed Global Forum website (dedicated Partners section) with institution description and materials
- Recognition on the media wall and on digital displays in the venue
- Recognition on AIMed Global Forum social media profiles (dedicated LinkedIn post)
- Full-page institutional profile in the Participants' Guide (PDF)
- 6 m² exhibit/demonstration space (optional — ideal for showcasing your lab's research and academic programmes)
- 1 bag insert

€15,000 net

Custom partnerships available on request.
